At Sun City Orthopaedic and Hand Surgery Specialists, our highest priority is the health and well-being of our patients and employees. We are continuously monitoring the coronavirus and the direction of the CDC. We have plans in place to be able to treat all of the patients that need continued care while maintaining safe practices.

In an effort to mitigate potential spread, if you are experiencing any respiratory problems or flu-like symptoms such as a cough, sneezing, fever and body aches, we ask that you please stay home and see your primary care doctor. You may call to reschedule your appointment when your symptoms have fully subsided.

We will continue to update you on any evolving changes.
